

Our Impact Driven Purpose

Background to Essential Utilities

Network utilities are an essential component of everyday lives; the majority of any community residents are dependent on network utilities for their day-to-day activities.

Utilities include communications, electricity, water and gas supply, sewerage and stormwater systems, roads, together with the buildings, lines, pipes, towers and other structures associated with them.

Network utilities are physical resources that must be carefully managed for the sustainable existence of any community.

Brand Impact

At Waimea Group, we act as though our life depends on it, because one-day it might! We power the people who underpin our community's utility infrastructure.

We thrive only as our communities thrive. We never rest...we think, develop, innovate and create to bring solutions and resources to those who build and maintain essential utility infrastructure.

Alongside our customers, we are on a journey to create a world of **affordable and clean energy, clean water & sanitation and uninterrupted communications.**

Wherever you are, we believe it is your right to have clean water, reliable sewerage & stormwater systems, affordable electricity, and the ability to communicate and remain connected.

With over 1,000 specialist vehicles operating in utility networks across the Pacific, Waimea Group is your partner in the community, supporting the creation of a sustainable future for both you and generations to come – a healthier and brighter tomorrow.

Enabling sustainable
communities to thrive on
reliable infrastructure for a
***healthier, brighter
tomorrow.***
